## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 9/19/2005 was filed after the mailing date of the Non-Final Office action on 4/28/2005. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Terminal Disclaimer***

2. The terminal disclaimer filed on 9/19/2005 disclaiming the terminal portion of any patent granted on this application has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Response to Arguments***

3. Applicant's arguments, see pages 10-16, filed 9/19/2005, with respect to claims 1-23 have been fully considered and are persuasive. The claim rejections - 35 USC § 102 & claim rejections - 35 USC § 103 of 4/28/2005 has been withdrawn.

### ***Response to Amendment***

4. Examiner acknowledges that the applicant has amended claims 1, 17, 18, & 21, canceled claims 22 & 23, and added claim 24.

***Allowable Subject Matter***

5. The following is an examiner's statement of reasons for allowance:

Claims 1, 9, 17, 18, & 21, recites an automotive lamp assembly comprising a non-reflective surface being positioned in between a first and second reflective surface in combination with light shield partially surrounding the light source where a driver is attached to the light shield and operable to move the light shield axially between a first position and a second position to selectively illuminate between first reflective surface, non-reflective surface, and second reflective surface.

Because none of the cited prior art reference disclose the combination, nor is there any motivation to combine them, the claims are deemed patentable over prior art of record.

Tatsukawa (USPN 6,837,601) teaches a lamp assembly having a reflector (24) with a first reflecting surface (24a1) and a second reflective surface (24a2), a light source (22) and a movable shield (26; Figures 2-3, column 5, lines 38-52). However, failed to disclose a non-reflective surface being disposed between the first and second reflecting surfaces.

Nordberg (USPN 3,751,659) teaches a reflector comprising a transitional surface between the two (or three) line-focusing portion of the reflector which, in a pressing process, will be joined together, can be coated with a black, non-reflecting material. However, failed to disclose the light shield partially surrounding the light source where a driver is attached to the light shield and operable to move the light shield axially between a first position and a second position to selectively illuminate between first reflective surface, non-reflective surface, and second reflective surface.

Claims 1-21, & 24 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
